

I chose to go to XM Satellite radio for the variety, no commercials, and for the fact that the stations I listen to are not "edited". As a consumer I feel that I, and only I should have the choice on what I want to listen to. I do not need someone to tell me what is offensive, I will make that choice for myself. People who do not wish to hear the "offensive" programming have a choice also- turn the station! The fact that so many other people are tired of the controlled "public" radio and have made the switch to satellite radio should be a wake-up call to the radio industry. Maybe there are more people who want to listen to programs and music that might offend others. The censorship of talk radio like "Howard Stern" or "Opie and Anthony" sickens me. I made the choice to PAY for the opportunity to get programming that I want. I pay for it, i'll decide what I listen to.

As for the traffic and weather services, if the people who subscribe to XM want it, there should be no argument. I PAY for it! leave XM satellite alone! It is not open to the public to listen to, it is for SUBSCRIBERS, and we are the voice of what we want.

I OPPOSE HR 4026!
